PIL Intermodal Services

Delivering sustainable and integrated transportation solutions

In an increasingly globalised world, we at Pacific International Lines (PIL) understand the importance of combining efficient and environmentally friendly methods to move your products from origin to destination.

As a container shipping line, we have significant experience in helping you carry your cargo across oceans from port to port. With our PIL Intermodal Services, we are able to complement our container shipping service and support you one step further, by providing a professional and reliable customised solution - leveraging our capabilities in rail, truck and barge to transport your goods inland, even across borders, to your final destination.

Our intermodal services is a good fit for companies with a focus on sustainable business practices and are available in Africa, North Asia, South Asia, Southeast Asia, Middle East, Latin America, and Oceania.

About Pacific International Lines (PIL)

Incorporated in 1967, PIL is ranked 12th among the world's top container shipping lines and is also the largest home-grown carrier in Southeast Asia. From a modest ship-owner in Singapore, PIL has developed into a global carrier with a focus on China, Asia, Africa, Middle East, Latin America and Oceania. Together with our sister companies Mariana Express Lines (MELL) and Malaysia Shipping Corporation, PIL serves customers at over 500 locations in more than 90 countries worldwide with a fleet of around 100 container and multi-purpose vessels.

Apart from the core liner shipping business, PIL also has several other business units such as container manufacturing, depot and logistics services.

With our mission of "Driving Connectivity", PIL strives to meet the needs of our customers through value-adding services.

Empowering You with Comprehensive Choices

PIL can be your one stop solution provider, offering you flexible options and a comprehensive network so you can choose how and where you would like your shipments to be transported from end to end.

The benefits of PIL's intermodal services are:

1. Three inland transportation choices

Train

Opting to move your goods via rail provides flexibility and timeliness for high volume shipments.

Truck

Trucks provide final mile deliveries, across varying distances, offering flexibility tailored to your supply chain schedule.

Barge

Barges are a good environmentally-friendly option for moving shipments inland via water transport routes that large vessels cannot access.

2. Hassle-free services

End-to-end
transportation

your needs

Environmentally
Friendly

3. Environmental protection

With more efficient transportation of goods and better connectivity, our intermodal service helps you reduce the overall carbon footprint of your supply chain, which in turn supports your company's sustainability goals.

Contact Us Today!

We will be happy to discuss with you on your transportation requirements. Please contact your local PIL representatives today!

You can also email us at PIL_Intermodal@sgp.pilship.com for any enquiries.
