About Pacific International Lines

Pacific International Lines (PIL) is the largest home-grown container carrier in Southeast Asia. As a People-Centric shipping line, we are committed towards Pushing Boundaries and being Future-Focused.

Our Purpose is clear:

Putting customers first, by leveraging expertise and technology to provide efficient and sustainable solutions.

From our home ground in Singapore, we provide shipping services and solutions to customers in over 90 countries worldwide, empowering you to reach across Asia, China, Africa, the Middle East, Latin America, Oceania, and the Pacific Islands with our fleet of around 100 vessels.

Why Choose PIL?

Young Fleet

We continuously invest in new reefer containers to ensure our fleet remains modern, reliable, and ready to meet your temperature-sensitive shipping needs.

Solid Experience

Established in 1967, we have close to 60 years of shipping experience, offering you personalised solutions to meet your evolving global logistics needs.

Latest Technology

Our reefer containers are equipped with the most advanced Active Controlled Atmosphere technology (Carrier Transicold's EverFRESH® and DAIKIN Active CA) to ensure reliable shipments!

PIL Cool (Reefer Telematics)

With our telematics platform, you get end-to-end visibility of your reefer cargo. Easily customise, monitor, and get insights into your shipment conditions.

Sustainable Shipment

Reduce your shipments' carbon footprint with our energy-efficient reefer containers.

People-Centric Support Team

Our local offices provide timely and responsive customer support, ensuring your needs are met with efficiency and care

What Can We Transport?

Fruits & Vegetables

Pharmaceuticals

Meat

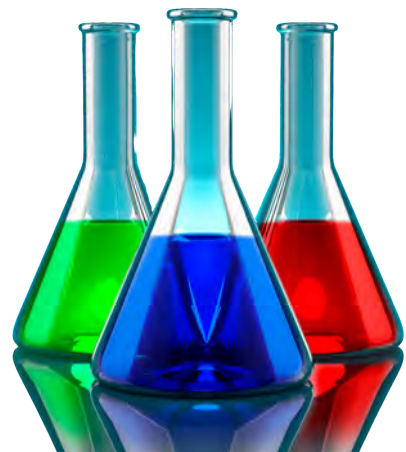

Batteries

Seafood

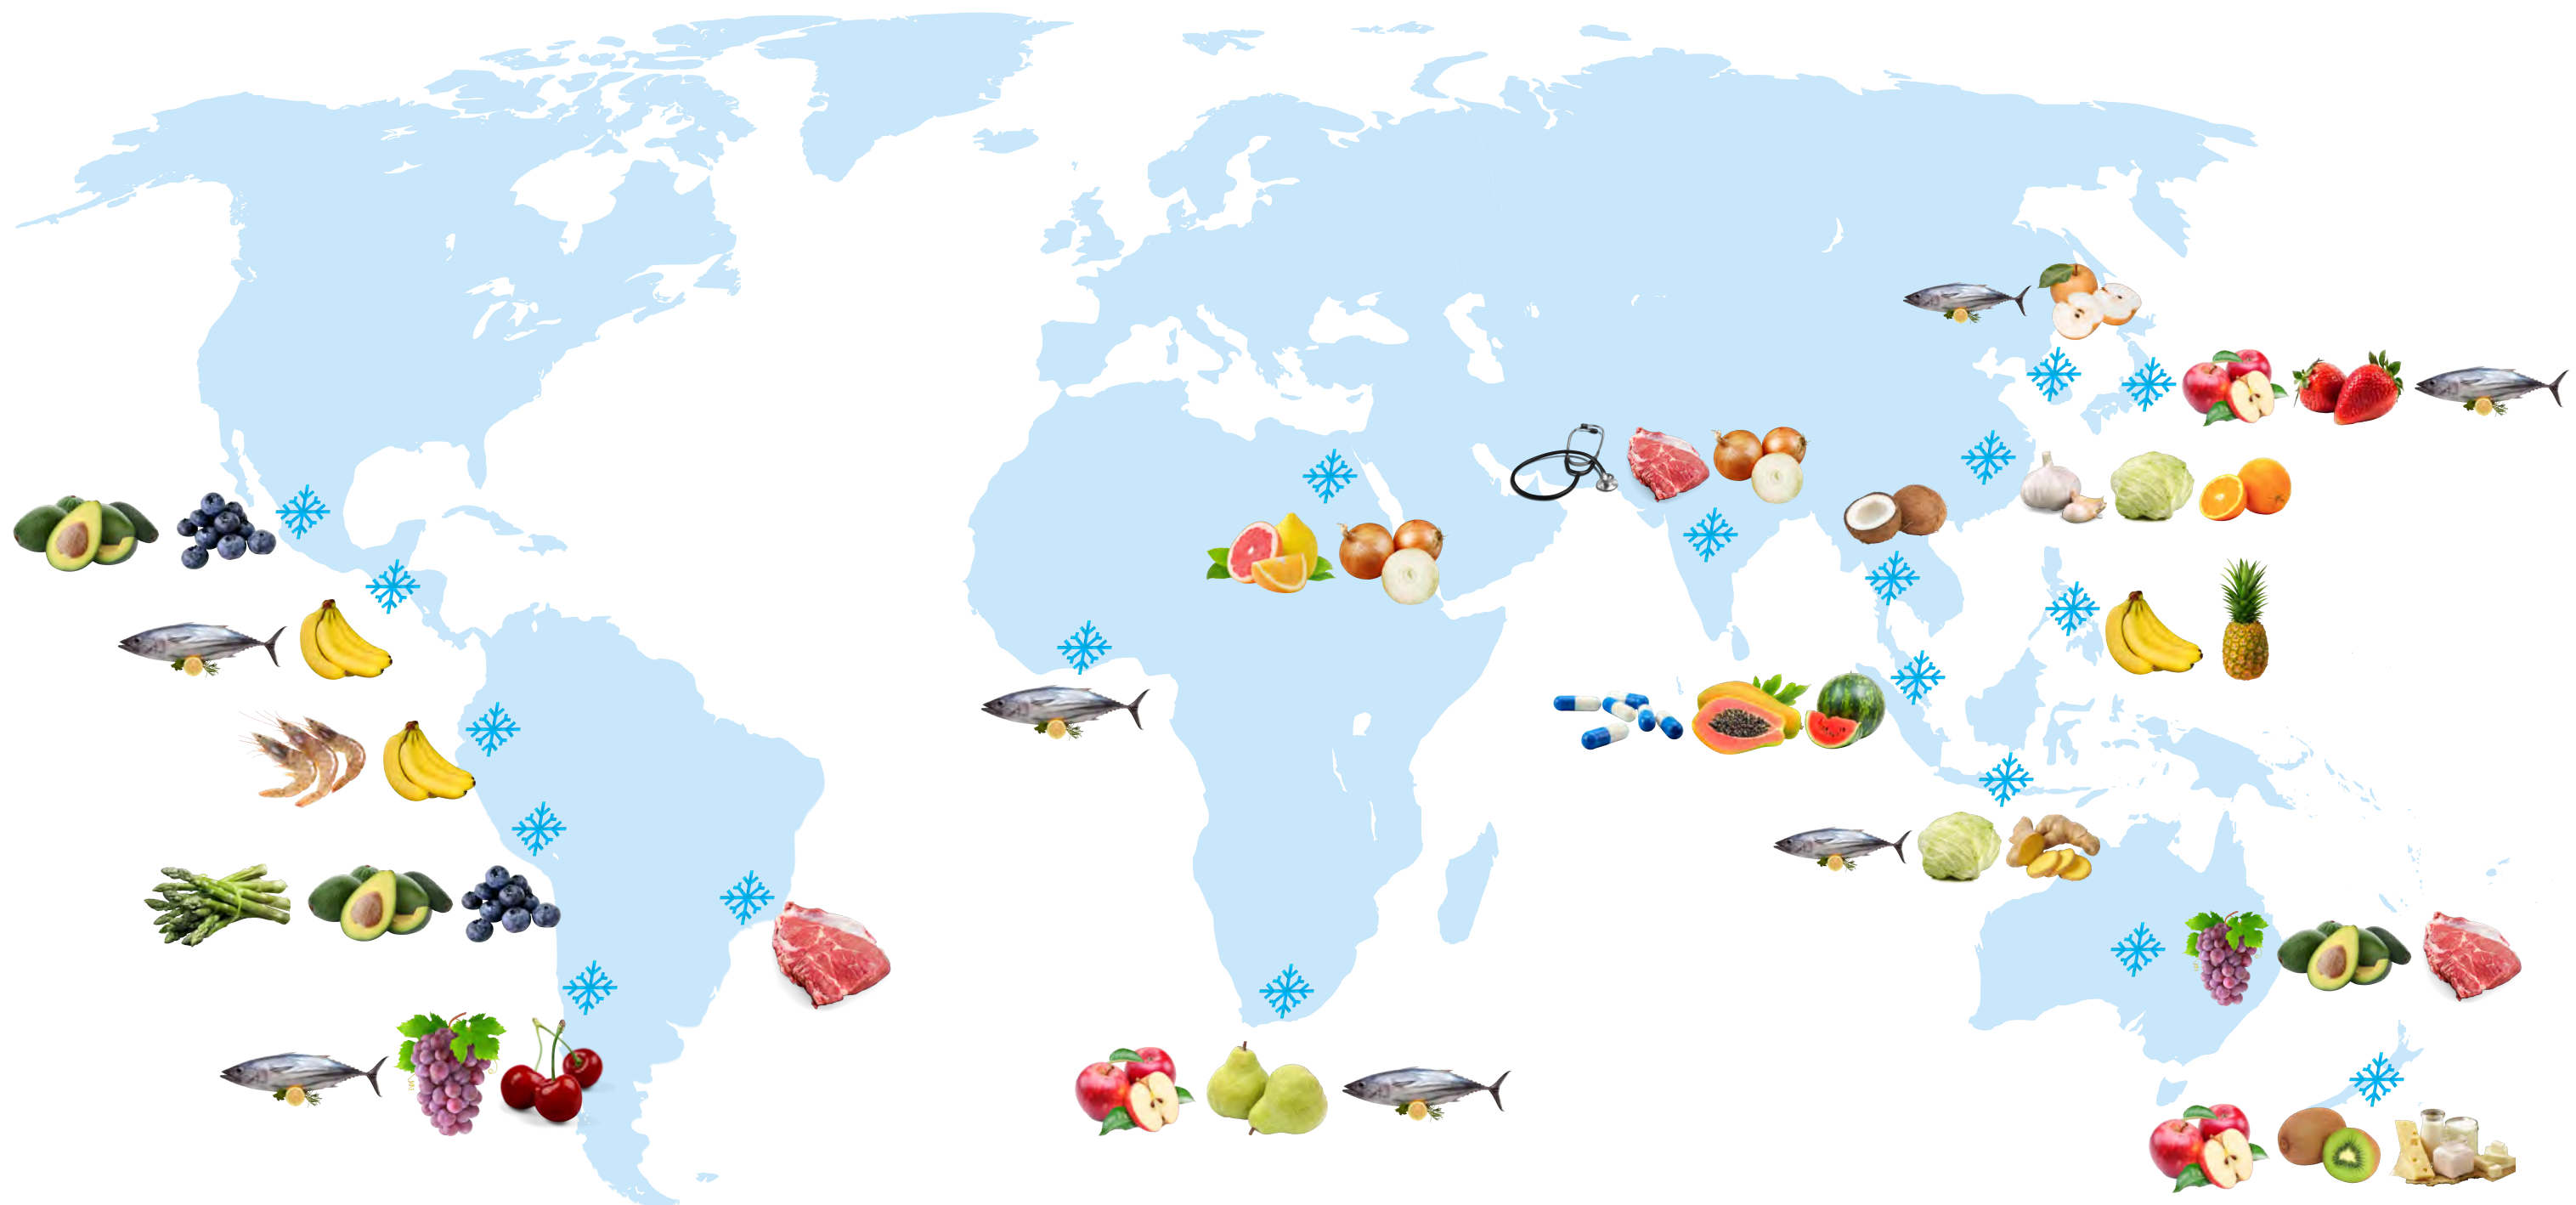

Chemicals

Where Can We Help You?

Whether it's perishables or pharmaceuticals, be it from the Americas, Africa, or Asia, PIL can customise an efficient and sustainable reefer solution for you!

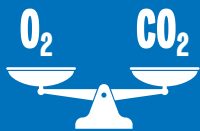

Our Technology

Controlled Atmosphere

Our young fleet of reefer containers are equipped with the most advanced Active Controlled Atmosphere technology (Carrier Transicold's EverFRESH® and DAIKIN Active CA) to maintain ideal conditions for the transportation of your produce.

Optimises the balance of oxygen and carbon dioxide inside reefers to slow down ripening

Generates high purity nitrogen to quickly displace oxygen that causes ripening

Cold Treatment

A chemical-free method to preserve the condition of your produce and a regulatory requirement to eliminate pests from entering importing countries through reefer shipments.

Sensor probes are placed in the core of the fruit to monitor its temperature

PIL can help you comply with regulatory requirements

Success Stories

Garlic and Ginger

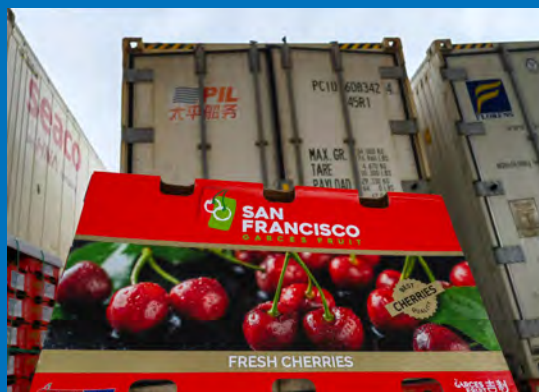

We are the first shipping line of choice for Qingdao Yifan Shunfeng Foodstuffs. Over 90% of their garlic and ginger exports from Qingdao, China to Brazil are shipped through PIL!

Committed to "Putting Customers First", our team made site visits to better understand their supply chain, and proactively coordinated equipment and space for them. Satisfied with our service, they even recommended PIL to their partners!

Cherries

Our Cherry Express service delivers freshly-harvested cherries from Chile to meet the rising demand in Asia! The service is through our weekly West Coast South America 6 (WS6) service that provides one of the fastest transit times from Peru and Chile to China.

Success Stories

Avocados

Be it from Australia, Kenya, or Peru, PIL has been successfully delivering avocados in excellent conditions to China and Southeast Asia!

From Australia to Singapore

From Peru to China

From Kenya to Brunei

For many years, Zespri and PIL have been partnering closely on shipping premium New Zealand Zespri kiwifruits quickly and efficiently to the market. This is especially important at the start of our season when Zespri is racing to get the fruit on supermarket shelves!

Well before each harvest season, Zespri and the PIL team in New Zealand would collaborate to ensure sufficient reefer equipment is in place, and that the capacity on the early season loaders is secured. PIL would also hold regular operational meetings with us as our crop forecast develops, so that any changes in shipping can be rapidly acted on.

Zespri prefers services with fast transits and are direct where possible. We are happy that PIL has met these requirements over the years, particularly for the key North Asian market of Taiwan, China. All in all, Zespri is pleased with how customer-focused PIL is in our partnership!

Mike Knowles
Shipping Manager, Zespri International

KOTAHI®

The team at PIL understands the importance of a prompt turnaround for fresh produce. By responding quickly to our operational and booking enquiries, PIL has enabled T&G Global, an exporter whom we serve, to deliver their premium export apples efficiently to global markets.

Kotahi has been impressed with PIL's equipment supply and commitment to securing additional space on vessels when required. PIL has delivered particularly well on T&G Global's early season requirements and has ensured positive outcomes for T&G Global and their customers.

David Ross
CEO, Kotahi

About Our Reefers

Specification Setting

Range

Temperature

-40°C to +30°C

Humidity

Off, 60% to 95%

Ventilation

Closed, 1 to 100%
Closed, 1 to 250CMH
Closed, 1 to 141CFM

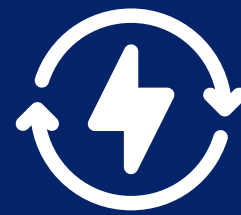

Engineered to securely transport temperature-sensitive items, including frozen and perishable products. Fully certified for food-grade compliance.

Optimised for on-site storage applications requiring precise temperature regulation

Structurally reinforced and durable
Thermally insulated
Easy to maintain

Advanced design and energy-efficient operation ensures optimal performance and reduced power consumption
